

Sharing your GP Record with other health professionals

Your GP Practice is part of a group of practices in the local area who are working together to meet your needs in the best possible way; this group is called a 'Cluster'

The Practice wants to help you receive a wider range of services in a shorter time. Our aim is to provide an overall service that better meets the needs of our patients

This means our Receptionist may offer you an appointment with another GP, Nurse or other health professional, such as a Physiotherapist within this practice, at one of the local GP practices or within the community

Medical records including diagnosis and current medication can be accessed by health professionals employed by the practice or the Local Health Board to ensure safety and continuity of care during treatment or consultations

If you would like additional information, please ask for a copy of the 'Primary Care Cluster; Access to your Medical Information' leaflet or speak to the Receptionist
